

**Job Title:** Software Developer  
**Location:** Westlake, OH

**Position Description:** We are looking for a motivated and creative software developer with 5+ years of experience in application development to join our growing organization. The ideal candidate will have excellent technical skills, be innovative, and be capable of delivering high-quality software solutions. They will have a track record of designing, developing, testing, implementing, and supporting software applications, and be able to work effectively in a team environment.

The successful candidate will have at least **5 years of experience in developing software applications using Microsoft's .NET framework and Microsoft SQL Server database**. They must be familiar with the software development life cycle and have excellent database management skills to design and develop applications for larger databases. Experience in web application development on DotNetNuke (DNN) platform is preferred.

**Responsibilities Include:**

- Designing and developing technical specifications and business logic components
- Prototyping, writing web interfaces, and customizing reports using the SSRS reporting tool
- Developing interfaces with third-party software applications
- Multitasking to ensure the timely completion of projects
- Working in a team environment and collaborating with other developers

**Required Skills:**

- Bachelor's degree in computer science, Information Systems, Engineering, or equivalent
- 5+ years of experience in software development using Microsoft Technologies
- Strong knowledge of .NET, C#, ASP.NET, SSRS reporting, HTML, MS SQL Server, XML, DTS, IIS, Web Services, and DotNetNuke
- Experience with responsive web design and development, customizing 3rd party eCommerce applications (Shopify, BigCommerce, LiftOff), modern interfaces, and content management systems.
- Experience with Web Stack: HTML, CSS, JavaScript, UI Frameworks (jQuery, Angular, React, Bootstrap)
- Experience with Windows & Web Services using C# and .Net Framework and .Net Core.
- Strong problem-solving skills, project management skills, and the ability to work well in a team environment.
- Excellent written and verbal communication skills
- Knowledge of software development methodologies, including Agile and Waterfall
- Experience with testing processes, testing tools, and development tools such as Visual Studio, Team Foundation Server (TFS), and diagnostic tools
- Knowledge of object-oriented methodology, Service-Oriented Architecture, Web Services, and design patterns
- Passion for learning new applications and technologies.

**Additional Skills:**

- Ability to demonstrate application prototypes and integrate user feedback successfully.
- Ability to run diagnostic tests and perform debugging procedures.
- Ability to document application design and support procedures.
- Ability to design and develop scalable and extendable applications.
